

ULTRATEMP HXi

INVERTER HEAT PUMP

BEST OF POWER & EFFICIENCY.

Pentair UltraTemp HXi heat pumps are equipped to automatically adjust performance to provide the optimal balance of heating power and efficiency. Just select your desired pool temperature on the crystal clear LCD display and the UltraTemp's onboard AI will do the rest.

PENTAIR ULTRATEMP HXi HEAT PUMPS

BEST OF POWER & EFFICIENCY.

With today's record energy costs, there's never been a better time to invest in an energy-efficient heat pump. Compared to gas or electric element heaters, UltraTemp® HXi Inverter Heat Pumps use just a fraction of the energy to generate the same amount of heat. In fact, under optimal conditions, \$1 worth of electricity produces \$14 worth of heat generated by other methods. That means more comfortable water temperatures and longer swimming seasons for you and your family.

PENTAIR ULTRATEMP HEAT PUMP FEATURES:

- ▶ Pentair heat pumps transfer heat from the air into the pool using only a fraction of the energy required to heat the pool directly.
- ▶ The UltraTemp HXi heat pump offers best in class efficiency with COP (coefficient of performance) ratings far in excess of standard heat pumps.
- ▶ The UltraTemp HXi heat pumps feature variable speed compressors and fan motors (full inverter). These operate at reduced speed when full power is not required, cutting electricity costs and noise.
- ▶ Pentair heat pumps use the EPA-recognized, environmentally safe, non-ozone depleting R32 refrigerant. This allows the UltraTemp HXi heat pump to be awarded the Eco Select® brand accolade for environmental responsibility.
- ▶ 100% titanium heat exchanger assures corrosion-free performance for extra long life and value.
- ▶ Full-colour, LCD touchscreen displays an intuitive, menu with easy to follow icons and messages.
- ▶ Self-diagnostic software continuously monitors system for peak performance.
- ▶ Thermostatic Expansion Valve (TXV) controls refrigerant flow and optimises efficiency over a wider operating temperature range.
- ▶ Automatic defrost feature senses refrigerant temperature and helps prevent the UltraTemp heat pump from freezing, allowing the unit to operate effectively at lower temperatures.
- ▶ Perfect companion to IntelliCenter® or EasyTouch® Control Systems—heat pump control can be transferred to a centralised control system that manages all your pool/spa operations and poolscape features.
- ▶ Easy barrel union plumbing connections.
- ▶ Market leading warranty.

eco select™

Features an intuitive coloured LCD touch-screen for clear and simple operation.
