6 BOXES >1600mm WIDE ONLY

Insert corner gussets into the side and front panels by inserting into the corner and pushing downwards. Remove metal dowel if applicable to your model.
7 DH / D

Insert the handles into the door untill a "click" is heard. Place the removable front door into the panel by placing the lip of the door over the front panel step. Insert the door by aligning the studs on the side with the slots in the front panel. Push in slightly and then down.
8 L / HP

Attach top door to unit with hinge pins. Align pins with holes and tap into place with a mallet.
