Viron^{QL}

The Viron QL cartridge filter is engineered for outstanding reliability and performance for your swimming pool or spa. Viron's filtration system is finer than a sand or glass media filter, and reduces cleaning frequency saving precious time.

ECO FRIENDLY

With less plumbing and no backwash line, installing and maintaining your Viron filter is so simple, almost anyone in the family can do it. The Viron is designed to save between 8,000 and 20,000 litres of water each year, by only requiring once a year cleaning for most residential pools. Made for Australian conditions Viron doesn't need regular flushing like sand or glass media filters, which means you save the equivalent of 37 hours of shower time in water.

LOW MAINTENANCE

Viron's secret lies in its low maintenance. With the use of four state of the art filter elements, they have enormous capacity so they only require cleaning once a year. An inbuilt automatic air bleed system also reduces the manual air bleeding process simplifying your routine maintenance program.

The Viron Story

Viron harnesses the elements of Australia to create pool products that are tough yet considerate of local conditions. They are developed through uncompromising engineering and design - with real world efficiencies - with our surrounding natural environment in mind, for now and the future.

In a world where energy demand continues to grow, Viron products focus on minimising environmental impact. In being the most energy efficient and environmentally friendly pool products on the market, Viron is here to prove that **ultimate performance need not cost the Earth.**
