What the Professionals Say...

“After 15 years in the spa industry, PoolFlow Lithium Pro stands alone in delivering exceptional results. Our clients’ spas now maintain crystal clear water for 6 months between drains instead of just 3 months, **saving about 4,000 litres** per spa annually. **Water clarity is noticeably superior**, even in our hotel spas with heavy bather loads. We’ve **cut our chemical inventory by 40%** and virtually eliminated cloudy water callbacks. **No other product on the market delivers these consistent results** in hot water environments. **It’s transformed our business while saving our clients water, chemicals, and hassle.**”

— Adam, Atlantis Pool & Spa Service - Ballina
